New Release

MatchID

Metrology beyond colors

MatchID 2027.1

New features:

- **Integrated support system:** direct ticketing and support request within the software
- **Improved calibration:** Auto-avoidance of blurred calibration dots (motion blur, out-of-focus). MatchID gimbal for auto-calibration
- **Advanced hardware synchronisation:** PTP-GIGE protocol for network syncing. Alternative hardware syncing via e.g. tensile machine
- **Levelled Finite-Element-Model Updating:** material properties identification beyond VFM
- **VFM module:** Considerable performance improvements (RAM and CPU) for material identification
- **Integration of Shimadzu HPVX-III:** readily available for testing
